Profile Summary

Final year BSc (Hons) Information Technology undergraduate with hands-on experience in software development, system integration, and server management gained through an Internship at Airport & Aviation Services (Sri Lanka). Experienced in developing full-stack web applications, computer vision solutions, and deploying applications in production environments. Passionate about building scalable software and continuously improving technical skills.

Experience

Software Engineer Intern | Airport and Aviation Services (Sri Lanka) (Private) Limited Dec 2024 – May 2025

- Developed internal software solutions using React.js, Node.js, Express.js, and MariaDB.
- Designed and deployed applications on Windows Server while ensuring compatibility with Red Hat Linux.
- Worked on system integration and server administration within the IT Division.
- Participated in application deployment, testing, troubleshooting, and maintenance.

Education

BSc (Hons) in Information Technology Specializing in Information Technology 2023 – 2026 (Expected)
Sri Lanka Institute of Information Technology (SLIIT)

GCE Advanced Level (A/L), Technology Stream 2021(2022)

GCE Ordinary Level (O/L) 2018

Skills & Abilities

Programming Languages & Frameworks: Python, JavaScript, C#, .NET, React.js, Node.js, Express.js, HTML5, CSS3, Tailwind CSS

Databases: PostgreSQL, MySQL, MariaDB, MongoDB

DevOps & Tools: Docker, Git, GitHub, GitHub Actions (CI/CD), PM2, Windows Server, Linux, Swagger (OpenAPI), Postman

AI & Computer Vision: OpenCV, YOLOv8

UI/UX Design: Figma

Other Technologies: WordPress, WampServer

Soft Skills: Problem Solving, Analytical Thinking, Teamwork, Leadership, Communication, Adaptability

Key Projects

LogiManage – Inventory & Logistic Management System | Freelance Project | [GitHub](#)

- Developed a full-stack, role-based inventory and logistics management system to streamline incoming inventory operations from entry to storage and department delivery. Implemented secure JWT authentication, inventory tracking, quality inspections, real-time notifications, audit logs, and PDF report generation to improve operational efficiency and compliance.

Technologies: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT, Git

StockSpot – Inventory Management System | Associated with AASL (Individual Project)

- Developed a full-stack inventory management system to streamline office asset tracking, warranty management, and report generation. Designed a responsive web application with secure multi-user access and deployed it on Windows Server with Red Hat Linux compatibility using PM2.

Technologies: React.js, Node.js, Express.js, MariaDB, PM2, Windows Server, Red Hat Linux, JWT

SpaceChecker – Parking Space Detection System | Associated with AASL (Individual Project)

- Developed an AI-powered parking space detection system that monitors parking slot availability in real time using computer vision. Built an intuitive desktop application for slot management and packaged it as a standalone executable for easy deployment.

Technologies: Python, OpenCV, YOLOv8, Tkinter, NSIS

cctvDetector – Object Detection and Tracking System | Associated with AASL (Individual Project) | [GitHub](#)

- Built a real-time object detection and tracking system for CCTV surveillance using YOLOv8 and OpenCV. Implemented automated alerts for missing objects to improve monitoring efficiency and enhance security operations.

Technologies: Python, OpenCV, YOLOv8, RTSP, Tkinter

LakeView – Gaming Zone Web Application | Associated with SLIIT (Group Project) | [GitHub](#)

- Collaborated in developing a full-stack web application to manage gaming center operations, including bookings, games, food services, staff, events, and resource management. Focused on building responsive user interfaces and backend functionality to improve operational efficiency.

Technologies: React.js, Vite, Node.js, Express.js, MongoDB, Mongoose, JWT, Git
